

Middle School Math Retake Policy

- ★ Only tests can be redone, no quizzes or homework.
- ★ Retakes are offered so students can improve their grades and learn from their mistakes.
- ★ After tests have been taken, graded, and passed out, students have two days to see me and ask for a retake. A retake will be scheduled within three days of the meeting.
- ★ Retakes can be done prior to school (8:00-8:20), during academic prep, or after school (3:10-3:30).
- ★ When scheduling the retake, students should be prepared to ask questions over the information and reflect what happened with the original test.
- ★ Students will be given a new test with different questions. The student will be given partial credit for their corrections. If they missed one point, they will be given half of the point back if the answer is correct. Students will only retake the questions they missed, not the entire test.
