

## Retakes for Math

- Only tests can be redone, no quizzes, homework, or daily work.
- Retakes are offered so students can improve their grades and learn from their mistakes.

### Retakes:

- After the tests are passed out, students have 2 days to see me and ask for a retake. A retake will be scheduled within three days of the meeting.
- Retake times offered will be: before school (8-8:20 am), Academic Prep (1:15-1:35 pm), or after school (3:10-??). It is up to the student to show up- I will not come to find you.
- When scheduling the retake with myself, be prepared to go over the information, and reflect on what happened with the original test.
- Students will be given a new test with different questions. The students will be given partial credit for their corrections. If they miss one point they will get half of the point back if the answer is correct.
